Harrold's
PEDIGREED STRAIN
Giant = Pansies

The Most Universally Useful Garden Flower

Easily Grown Anywhere —o— In Bloom For Months
 Hardy Practically Everywhere

HARROLD'S PEDIGREED STRAIN PANSIES, the result of over forty-five years of horticultural experience and extensive breeding, afford you the very ultimate in quality with this universally popular, easily grown garden flower. They will stand 10 to 15 degrees of freezing without protection and when given light protection, such as is given other perennials in your climate they are hardy in any part of the United States and most of Canada.

The blooming season of HARROLD'S PEDIGREED STRAIN PANSIES can be extended over a season of at least six months in most places and all year in many favored localities. American bred and grown for our American gardening conditions and taste, they afford you the finest strains from which may be obtained outstanding results. Naturally your local climate and the care you give to their culture will determine these results, probably nearly as much as the strain quality and variety, but pleasing results may be obtained more easily with the best strains even where conditions are not ideal. Bred and distributed for more than 30 years to the critical professional florist and nursery growers of the world, HARROLD'S PEDIGREED STRAIN varieties offer you seeds with which to obtain the best results under a given culture.

WHEN TO PLANT PANSIES

The largest Pansy flowers are produced on plants that are from seeds sown in late July, August and early September and transplanted in October or November so as to become established after transplanting before winter. These give the very largest flowers early the following spring. They may be planted and transplanted later in the warm Southern States where they may be grown as a winter flowering plant. July planting, however, is advisable where winters are long and severely cold. Planting too early is little advantage and where the weather is really hot some difficulty may be experienced in obtaining good germination unless considerable care is taken. Pansies may also be planted indoors in January and February for plants that will be set outside in early spring for late spring and summer flowers. Also the seeds may be planted where they are to bloom in April or May for plants that will give their best flowers during the summer and fall months. In fact, in most climates, Pansies may be had in flower during the entire flowering season; from that of the earliest bulbs in spring until after frost in the fall. Our packets of seeds are liberal in quantity so that each gives you enough seeds of a variety to fill out your requirements for a home garden for an entire season. Our booklet "MODERN PANSIES" that accompanies all orders for seeds or plants gives complete information needed for your success with Pansies.

SELECTING THE VARIETY YOU WISH TO GROW

We offer here a most complete selection of Pansies, probably the most varied selection available from a single growing specialist in the United States. Each variety has its own characteristics although each is of the highest quality we know how to produce in its individual class. In mixtures the price range to some extent is an index to the capabilities of the variety as to size of the flower and richness of the color range. The more expensive varieties are more highly bred and so more costly to produce. There are colors and combinations in these sorts not to be found in the cheaper varieties. In so far as the quality of the seeds is concerned, however, this is always the highest that can be produced in all Harrold's Pedigreed Strain varieties. We never grow seeds down to a price but always price to a quality.

In bedding mixtures we consider our Harrold's Pedigreed Giant Art-Shades to be the largest flowered. Flower type is predominantly "Exhibition" meaning that the center blotch is less than half the area of the flower and that this is surrounded by wide bands of lighter colors; sometimes two or more. This type also carries some "self" colors (solid colors) as well as pastels with penciled centers and the duo-tone types. Color tones are light and brilliant. Our Harrold's Pedigreed Giants (the parent of the Harrold's Pedigreed Giant Art-Shades) is a variety which is older therefore a little less modern in size and color. The color range is, however, at variance with that of its progeny.

Our Harrold's Pedigreed Swiss Giants we consider to be the finest available sort of "Fancy type. This type is distinguished by its large center blotch (sometimes covering more than three-fourths of the flower area) and the narrow band of color around the blotch. Shades usually run much darker than the Exhibition types because of the larger blotch and the near absence of the self colors. Also this type stock carries more reds, blues and bronze shades and less of the brilliant yellows and pastels found in the Exhibition types. The color blend of the two types is sufficiently different to make the use of both advisable for full variety. Our Harrold's Improved Swiss is more closely held to the original Swiss strain coloring with a bit smaller flowers and less varied range. They are improved over the original Swiss strain as imported from Europe in that they have been bred to better meet our American growing conditions.

Formal colors are of use only where beds are set to a planned color scheme. We have offered here the very cream of these colors and those that may be classed as truly Giant. In growing this group it must be remembered that no separate color Pansy grown from seed can be depended on to be 100% true to color or marking and so it is always necessary that transplanting be done into selection beds from which true color and type plants are selected for the final display bed. The care in this selection depends on the uniformity desired and the color used but for such work it will be necessary to grow from twenty to fifty percent more seedlings than will be used in the final planting. Our stock is as true as any we know of in this respect but the condition is universal.

The novelties are either new and unusual or special purpose varieties which almost any fancier will find of interest to grow. Each is described here and so other than recommending them to you for their interest and usefulness we refer you to these descriptions.

Our 1949 Introduction
C. W. Harrold's Private Blend

Specimens Pictured In Color Are From This Seed

C. W. Harrold, the founder of our firm is still actively in charge of our breeding work and seed production at the age of 78. He has been working with Pansies for about 50 years and is the oldest living specialist breeder of Pansies in the United States now actively producing seeds and plants commercially. These are his babies. They are the finest selections of types for bedding found in a single mixture today and he has drawn on our best strains and breeding work to blend this all type mixture. We believe it to be the ultimate in a general mixture today.

As may be seen from the natural color photo the color and type range is most varied. In fact there is probably over 800 colors, color combinations and markings in this blend. It contains many new shades and markings not found in our other sorts and as always the plant and flowering habits are the ultimate. The results will be outstanding when given suitable culture.

SEED PRICES: Per packet, about 300 seeds, \$3.00; $\frac{1}{2}$ oz., about 700 seeds, \$5.00; $\frac{1}{4}$ oz., \$9.00; $\frac{1}{8}$ oz., \$15.00; $\frac{1}{4}$ oz., \$25.00.

PLANTS: These may be offered this fall but it is not certain they will be. If they are list will appear in our September edition.

HARROLD'S OUTSTANDING NOVELTIES

HARROLD'S GIANT ATOMIC DAWN

A small, pre-introduction sale of this new sort last fall indicates that this may become one of our most popular items. While the flower size is not as large as our mixtures recommended for general bedding it produces such unusual colors that many gardeners are going to be enthusiastic about it on that account. Flowers are of many shades including soft pink, lavender, delicate blue, light gold, poly-chrome bronze and many pastel shades. Markings are penciled and light blotches as well as some Exhibition type blotch. Many flowers are heavily ruffled. SEED PRICES per packet, about 200 seeds \$4.00; $\frac{1}{2}$ oz., \$8.00.

HARROLD'S PEDIGREED NOVELTIES

These are a blend of seeds grown from NEW TYPES in our breeding department. While they do have a large number of the better types from the other Harrold's Pedigreed Varieties many unusual new types are included that are still in the development stage and have as yet not been incorporated into any of the regular strain varieties. Recommended where the most varied and unusual is desired. SEED PRICES per packet, about 500 seeds, \$4.00; $\frac{1}{2}$ oz., \$10.00. NO PLANTS of this variety will be available this year.

HARROLD'S SUNSET GIANTS

Our outstanding 1944 novelty introduction. Sunset shades of orange, red and gold. Giant in size the markings range from blotched to ray types with some yellow selfs. Shading is brilliant and a bed of these is sure to attract much attention. SEED PRICES per packet, about 500 seeds, \$3.00; $\frac{1}{2}$ oz., \$8.00. PLANT PRICES: ready after Oct. 1st., 25 for \$3.00; 50 for \$5.00; 100 for \$8.00 postpaid.

HARROLD'S PEDIGREED POT PANSIES

A short, compact growing type adapted to pot or porchbox growing. Flowers are large and color range is very brilliant. SEED PRICE per packet, about 500 seeds, \$2.00. Plants of this variety will NOT be available this year.

PANSY NOVELTIES Continued in next column.

HARROLD'S PANSIES are noted for their ability to produce the largest flowers on desirable, compact plants. The color range has never been surpassed.

HARROLD'S PANSIES ARE unsurpassed in size and color, texture, hardy and robust plant habit and long flower stems. They are just as easy to grow and are much more interesting.

A SPECIMEN OF OUR HARROLD'S PEDIGREED GIANT ART-SHADES, An outstanding Exhibition variety. Size reduced 1/4.

Outstanding Mixtures

HARROLD'S PEDIGREED GIANT ART-SHADES

We consider this to be THE FINEST EXHIBITION type of Pansy available today. With good culture the flowers are extremely large (we have had them five inches across in the seed production field). They flower very early and the coloring is very brilliant. Normally there are over 500 color combinations and markings in this mixture with many pastels as well as pure deep colors. The markings, typically Exhibition, range from self colors through the dainty penciled to the tri-color blotches having a veritable rainbow of color in a single flower. The plant habit is equally robust and this variety is hardy under reasonable treatment anywhere in the United States and most of gardening Canada. For mass bedding these are not excelled in their display because of the brightness of the color scale while selections from this mixture will give outstanding specimens for individual setting. The flower stems are long, usually being adequate for good bouquets. This variety is an improved progeny of our Harrold's Pedigreed Giant variety.

SEED PRICES: Per packet, about 500 seeds, \$2.00; 1/16 oz., \$4.00; 1/8 oz., \$7.50; 1/4 oz., \$13.00; 1/2 oz., \$25.00; 1 oz., \$45.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th — 25 for \$2.50; 50 for \$4.00; 100 for \$7.00; 250 for \$12.50; 1,000 for \$45.00 postpaid.

HARROLD'S PEDIGREED GIANTS

This outstanding "Exhibition" type was introduced by us in 1929 and has maintained its popularity throughout the years. Flowers are very large on compact, robust plants that produce a most varied range of bright colors. The flower markings are typical of the type with selfs, penciled and blotched centers and tri-color patterns of contrasting colors. Many flowers over 4 inches with good culture.

SEED PRICES: Per packet, about 500 seeds, \$1.50; 1/16 oz., \$3.00; 1/8 oz., \$5.50; 1/4 oz., \$10.00; 1/2 oz., \$18.00; 1 oz., \$35.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th — 25 for \$2.00; 50 for \$3.25; 100 for \$5.50; 250 for \$10.00; 1,000 for \$35.00 postpaid.

NOVELTY GROUP Continued

HARROLD'S PEDIGREED CUT-FLOWER PANSIES

We have two distinct types of these and depending on requirements either selection has a definite field.

ORIGINAL STRAIN: This was our first type offered 15 years ago. Growth is rather low but under glass the flowers are large and on stems 8 to 12 inches long. The color range is about as varied as regular bedding types and the plant is just as hardy as the bedding varieties. Suitable for outdoor growing where the stems will be a bit shorter though satisfactorily long for bouquets. **SEED PRICES:** per packet, about 500 seeds, \$2.00. **PLANTS:** after Oct. 1st., at the same price as our Harrold's Pedigreed Giant Art-Shades.

TALL SELECTION: These grow taller; up to 4 1/2 feet and stems are usually 10 to 16 inches long and quite stiff. Color range is the best of any of the tall growing strains and flower size is good under proper culture. The plants of this variety will freeze at temperatures below 20 above. Recommended out of doors only in mild climates. **SEED PRICE:** per packet, about 200 seeds, \$3.00. **NO PLANTS** for sale.

HARROLD'S PEDIGREED SWISS GIANTS

Our latest and finest "Fancy" type Pansy. The Fancy type has the typically large center blotch as shown in the picture at the bottom of this column. This variety is the ultimate in flower size and color range on compact, sturdy plants. The flowers of heavy substance and velvety texture are brilliantly colored with many red and deep shades which are individually outstanding. Under good culture it is possible to grow 4 1/2 inch flowers from this strain though in this respect it is not quite so large as Harrold's Pedigreed Giant Art-Shades. For variety we suggest the use of both these varieties if you really want the maximum in display.

SEED PRICES: Per packet, about 500 seeds, \$2.00; 1/16 oz., \$4.00; 1/8 oz., \$7.50; 1/4 oz., \$13.00; 1/2 oz., \$25.00; 1 oz., \$45.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th — 25 for \$2.50; 50 for \$4.00; 100 for \$7.00; 250 for \$12.50; 1,000 for \$45.00 postpaid.

HARROLD'S IMPROVED SWISS

Where a "Fancy" type mixture is needed and price is a consideration this one is to be highly recommended. Not as good as our Harrold's Pedigreed Swiss Giant of course, but it is not to be excelled by any strain we know of usually offered as "Swiss" in this price class. It is unusually suited in color, size and habit to the demands of the American Gardener. Flowers are of giant size, up to four inches and the color blend is especially rich.

SEED PRICES: Per packet, about 500 seeds, \$1.00; 1/16 oz., \$1.75; 1/8 oz., \$3.00; 1/4 oz., \$5.00; 1/2 oz., \$9.75; 1 oz., \$18.00.

PLANTS FROM OPEN FIELD BEDS: Ready after October First — 25 for \$1.50; 50 for \$2.50; 100 for \$4.50; 250 for \$9.00; 1,000 for \$30.00.

HARROLD'S ALL-AMERICAN BEDDING MIXTURE

This is a blended mixture; 80% is from ALL the Harrold variety originations and 20% is from the many other varieties which we grow or receive from other sources. This is a very useful general purpose mixture and is an outstanding value in the popular price range. Highly recommended for general bedding. Flowers are giant in size and the coloring is most varied.

SEED PRICES: Per packet, about 500 seeds, \$1.00; 1/16 oz., \$1.75; 1/8 oz., \$3.00; 1/4 oz., \$5.00; 1/2 oz., \$9.50; 1 oz., \$18.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th — 25 for \$1.50; 50 for \$2.50; 100 for \$4.50; 250 for \$9.00; 1,000 for \$30.00 postpaid.

Modern Pansies

THEIR HISTORY, CULTURE & HABITS

In order that you may grow Pansies easily and more satisfactorily we issue a comprehensive culture booklet under the above title. As far as we know, this is the most complete treatise on Pansy culture now in print comprising some 7,000 words of text describing the history and habits of Pansies as well as the most minute cultural detail both for the home gardener and the commercial grower producing plants in quantity. This booklet is FREE WITH EVERY ORDER for either Pansy or Viola seeds or plants. Those desiring the booklet alone may obtain a copy by remitting TWENTY-FIVE CENTS IN COIN. It will be sent postpaid.

This Specimen was over four inches in diameter. The strain is well balanced in color, with fine form and size. Early flowering.

Introduced in 1937, Harrold's Pedigreed Swiss Giants have developed a high popularity. A typical fancy type.

PANSY SEEDS Continued

HARROLD'S
FORMAL COLORS

These formal colors are useful for borders or bedding where it is desired to carry out a color scheme or design. It should be remembered however that NO separate color variety is 100% true from seeds (usually from 80 to 90%) and that for a true color bed it will be necessary to eliminate off color plants.

HARROLD'S AZURE GIANTS: The finest intensely blue Pansy.
HARROLD'S GOLDEN GIANTS: Deep golden yellow with large velvety blotch.
HARROLD'S RUBY GIANTS: Shades of deep red in the finest range.
CORONATION GOLD: The finest pure yellow self. Slightly penciled or no marking.
DELFT BLUE: Porcelain blue. A delightfully delicate shade.

SWISS GIANT TYPE SEPARATE COLORS —

ALPENGLOW: Select dark red shades. Harrold's Ruby is better.
BLACK KING: The largest size, nearly black Pansy.
BLUMLISALP: Soft pink and rose, velvety blotch.
FIRE BEACON: Wallflower red-orange with velvety blotch.
LAKE OF THUN: Sometimes listed as Thuner Sea or Ulswater Blue. A lovely bright blue with dark center. Harrold's Azure is better.
ORANGE GIANT: Rich light orange self shaded apricot. Very attractive.
PURE WHITE: The finest pure white. Fragrant and lightly ruffled.
RASPBERRY ROSE: Soft raspberry pink, velvety wine colored blotch.
RHEINGOLD: Deep yellow with dark blotch. Harrold's Golden Giants better.

SEED PRICES — Any of the above 14 varieties, per packet of about 500 seeds, \$1.00; 1/8 oz., \$2.00; 1/4 oz., \$3.50; 1/2 oz., \$6.00. **PLANT PRICES —** those available will be listed in our September edition.

Other American Varieties

This group covers mixed color varieties which have had more or less popularity among American Gardeners. We offer these so that not only can you order our Harrold's Pedigreed Originations but where desired you can include seeds of your favorite varieties and strains at the same time with maximum convenience.

| VARIETY | Per 500 seed | Pkt. | 1/8 oz. | 1/4 oz. | 1/2 oz. |
|--|--------------|--------|---------|---------|---------|
| PANSY AMERICA: Early mixture. Good size and color. | | \$.75 | \$1.50 | \$2.75 | |
| ENGLEMANN'S GIANT: Of English origin. Dark and light shades of large size. | | 1.00 | 1.75 | 3.25 | |
| GENEVA GIANTS: A select super-Swiss type strain. | | 1.00 | 1.75 | 3.25 | |
| JUMBO MIXED: (Steele) Harrold grown first generation from originator's stock seed. | | 1.00 | 1.75 | 3.00 | |
| MAPLE LEAF GIANTS: Robust compact plants. Dark color. | | .75 | 1.50 | 2.75 | |
| ORCHID PASTEL MIXTURE: Various offered as Butterfly or Hybrid Mixed. Light & pastel shades. Not large. | | 2.00 | 3.00 | 5.00 | |
| OREGON GIANTS: Mixed types as well as colors. Good size. | | .75 | 1.50 | 2.75 | |
| SUPER MAPLE LEAF: Improved re-selection of M. L. | | 1.00 | 1.75 | 3.25 | |
| SCOTTISH EXHIBITION: A nice blotched blend. | | 1.00 | 1.75 | 3.25 | |
| SUPER SWISS MIXED: Selected to 5 petal blotch. | | 1.00 | 1.75 | 3.25 | |
| SWISS GIANT MIXED: A good 3 & 5 blotched type. | | .75 | 1.50 | 2.75 | |
| DWARF SWISS MIXED: A dwarf selection Swiss type. | | 1.00 | 1.75 | 3.25 | |
| TRIMARDEAU GIANTS: A cheap bedding type mixture. | | .50 | 1.00 | 1.75 | |

IMPORTED PANSY SEED

These few varieties come to us from the foremost European specialists. They are the finest varieties available in their respective class but most are smaller flowered and of less robust plant growth than our American varieties. For the fancier interested in types they will prove to be quite interesting and the separate colors are most useful in formal plantings as they come more true to color than do the newer separate color varieties listed earlier in this list. Hiemalis or Ice Pansy is desirable because of its extreme hardiness and early flowering habits. Most of these sorts are about half way between our modern American varieties and the Violas and Tufted Pansies in flower size and bloom as freely as the latter types. You will find many uses for them.

| VARIETY | Per 500 seed | Pkt. | 1/8 oz. | 1/4 oz. | 1/2 oz. |
|--|--------------|--------|---------|---------|---------|
| BUGNOT'S SUPRE BLOTCHED: Dark shades & heavy blotch. | | \$.50 | \$1.00 | \$1.60 | |
| CASSIER'S 3 AND 5 BLOTCHED: Many mauve and steel blue shades with 3 or sometimes all 5 petals blotched. | | .50 | 1.00 | 1.60 | |
| ODIER'S GIANT BLOTCHED: Many red and bronze shades. | | .50 | 1.00 | 1.60 | |
| ORCHID FLOWERED MIXED: Many delicate pastel shades. The flowers are not large but the coloring is interesting. | | 1.00 | 2.00 | 3.50 | |
| TRIMARDEAU GIANT BEDDING (French Type) | | | | | |
| ADONIS: Light blue with white eye. | | .50 | .90 | 1.25 | |
| CANDIDISSIMA: Snow white. | | .50 | .90 | 1.25 | |
| CARDINAL RED: As named. Quite showy. | | .50 | .90 | 1.25 | |
| KING OF THE BLACKS: A fine black-purple. | | .50 | .90 | 1.25 | |
| LORD BEACONSFIELD: Lower petals violet blue, upper ones shading lavender to white at edges. Striking. | | .50 | .90 | 1.25 | |
| PRINCE HENRY: Rich dark blue. | | .50 | .90 | 1.25 | |
| GIANT BEDDING (Holland type) | | | | | |
| ORANGE KING: Brilliant orange and apricot. | | .75 | 1.25 | 2.25 | |
| PURPLE GIANT: A deep royal purple of velvet texture. | | .75 | 1.25 | 2.25 | |
| ST. KNUD: Deep orange yellow. | | .75 | 1.25 | 2.25 | |
| HIEMALIS BEDDING (Ice Pansies) Blooms under the snow. | | | | | |
| BLUE BOY: Silver lilac. | | .60 | 1.00 | 1.90 | |
| CELESTIAL QUEEN: Brilliant sky blue. | | .60 | 1.00 | 1.90 | |
| CLARET: A fine deep wine red. | | .60 | 1.00 | 1.90 | |
| MARCH BEAUTY: Dark velvety purple. | | .60 | 1.00 | 1.90 | |
| NORTHPOLE: Glistening pure white. | | .60 | 1.00 | 1.90 | |
| ORION: Pure golden yellow. | | .60 | 1.00 | 1.90 | |

Primrose Seed

See our last edition for full list of these or ask for a copy.

FOR BETTER & LARGER BLOOM
FEED YOUR PANSIES WITH

Harrold's Pansy - Grow

In growing Pansies an adequate food supply is a prime essential to the production of the largest flowers and outstanding results. Some sort of fertilizer is practically a necessity with any normal garden soil and there is nothing that will excel the liberal use of cow manure. However, this is something not available to many gardeners so we have developed this product which we call HARROLD'S PANSY GROW.

It is an entirely organic compound, practically odorless and carries the essentials that will give good Pansy growth and flowers when combined with soil of a reasonably good type for general gardening. No matter how excellent the strain quality of the Pansies you grow its use will result in improved flower size and texture and a more healthy, robust plant growth.

Unlike water soluble chemical fertilizers this plant food is applied when the plants are transplanted into the bed where they are to grow and bloom and its effect will carry the plants through the entire blooming cycle instead of just over a few weeks as with the chemicals. One application per season should prove sufficient and on that basis it is economical in cost. A light application may be made when planting the seeds but this need not be heavy - a tablespoonful to two square feet.

ECONOMICAL PRICES.

HANDY HOME GARDEN PACKAGE: Enough for 50 plants, 75¢ postpaid; 250 plant size, \$3.75 postpaid.

BULK QUANTITY SIZE: 25 pounds, \$6.25; 50 pounds, \$10.00; 100 pounds, \$18.00. These sizes by express collect.

Application is at the rate of 4 pounds per 100 square feet of bed (a plot 10 by 10 feet). It is just as valuable for Violas, Violets, Fuchsias, Lantana, Delphiniums, Columbine and many other perennials. Also desirable for porch boxes and as a plant food in potting soil for house plants because of the lack of odor.

Viola Seeds

Violas are a very satisfactory companion to Pansies and in many instances they are most desirable. The following lists the finest sorts available today, all highly recommended. Culture is the same as for Pansies.

SEEDS PER PACKET (about 500 seeds) \$1.00; 1/8 oz., \$1.75.

- JERSEY GEM:** The outstanding compact violet blue.
- LAVENDER GEM:** Similar to Jersey but lavender blue.
- YELLOW GEM:** The largest flowering golden yellow of compact habit.
- WHITE GEM:** The finest large flowered pure white. Almost as large as Pansies.
- GEM VARIETIES MIXED:** A mixture of the above 4 and others of this type.
- ADMIRATION:** Large dark blue.
- APRICOT:** Apricot yellow tinged orange. A striking color.
- ARKWRIGHT RUBY:** Ruby red. Unlike most Violas they have a large blotch.
- BLUE ELF:** Top deep violet shading lighter toward the bottom. Yellow eye.
- BLUE PERFECTION:** Very popular purple blue. A good one.
- CHANTREYLAND:** The finest pure apricot. Grand in mass planting.
- GUSTAV WERMIG:** Long stemmed cut flower violet blue.
- ILONA:** Rose shade, lavender tinge.
- IMPROVED SCOTCH BEDDING MIXTURE:** Large flowered mixed.
- KING HENRY:** NEW! Rich violet blue with small yellow eye.
- LUTER SPLENDESE:** The standard golden yellow.
- PAPILIO LIGHT BLUE:** Light blue with white center. Penciled throat.
- WHITE PERFECTION:** Large flowered pure white. Profuse flowering.

Delphinium Seeds

This strain of hybrid Delphinium is without doubt the finest available today for the American garden and is sufficiently hardy to permit its culture in practically any section of the country. They come remarkably true from seed for stock of hybrid origin and the plants are more resistant to disease than any of the other large flowered strains. Not quite as tall as the English varieties (a definite advantage in windy locations) the flower stems are tough and willowy, withstanding culture in exposed situations much better. The flowers are huge and the percentage of double flowers produced is very high when grown from our seeds. In fact we believe there is no better strain to be had.

New crop seeds start becoming available in early July and many gardeners prefer to plant as soon after harvest as possible. If a cool cultural condition is possible germination should be good although these seeds are often somewhat erratic in their germination. We supply a free cultural leaflet with each shipment of these seeds.

- BLACK KNIGHT:** Really dark shades of velvety texture.
- BLUE BIRD:** A fine medium blue with white bee.
- BLUE JAY:** A very intense, brilliant blue with dark bee.
- CAMELIARD:** An exquisite pure lavender. Very striking.
- GALAHAD:** The finest pure white ever produced. Heavy in double flowering plants and comes quite true to color for a white.
- GUINEVERE:** A new pinkish lavender with white bee. Very fine.
- KING ARTHUR:** Royal violet blue with white bee. Very large.
- LANCELOT:** Pure lilac with white bee.
- ROUND TABLE:** An exquisitely blended mixture of all the select colors.
- SUMMER SKIES:** Light blue with an attractive white bee.

Seeds will be shipped as soon after harvest as available.
PRICE per packet, about 200 seeds \$1.00; 3 packets (150 seeds each) \$2.50; 6 packets (100 seeds each) \$3.50; 10 packets (100 seeds each) \$5.00.

TERMS OF SALE

See the order blank enclosed for full details on these.
 Remittance to the full amount of your order must be sent. We do not ship C. O. D. Stamps of 10¢ or smaller denomination will be accepted but not in amounts of more than 50¢. Prices are prepaid except where otherwise quoted.
 We do not guarantee culture or results and will in no way be responsible for the crop to an extent greater than the actual purchase price received.
